

IDAHO WATER ENGINEERING

PRESENTS:

A WATER RIGHTS SURVIVAL COURSE FOR IDAHO REAL ESTATE AGENTS

Course taught by Dr. Dave Tuthill and Mr. Hal Anderson,
and Moderated by Ms. Anita Warntjes

All three are 30+ year former employees of the Idaho Department of Water Resources

Idaho is experiencing huge changes in the delivery of water — Your Clients need to receive accurate information from their Real Estate Agent

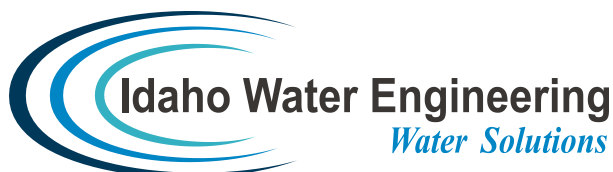

Quote From a Student Evaluation of the Course Taught on January 25, 2022:

Excellent class! One of the best CE I've taken during my 10+ year real estate career. The class was interactive, and I liked the polls and breakout sessions. A water right course should be a CE requirement in my opinion, that's how important and valuable the class is, especially to all the new agents. Very knowledgeable instructors!

Course Content:

- ⇒ Basic water right principles
- ⇒ Basic water terminology (i.e. what is a miner's inch, a cfs, an acre-foot?)
- ⇒ Water right forms
- ⇒ What a water right adjudication means to you and your clients
- ⇒ How conjunctive administration of surface and ground water will forever change how water is administered in Idaho
- ⇒ "When to hold 'em and when to fold 'em"
- ⇒ Small group discussions in chat rooms regarding your questions and experiences

Each participant will receive a complimentary reference set of copyrighted slides as a .pdf file

2 Sessions Offered

Friday Feb. 24, 2023
Tuesday Mar. 21, 2023

Each session is limited to the first 25 to sign up
